Mr. Trip Wileman  
Kingdom Community Wind  
529 Meek Road  
Lowell, Vermont 05847

January 20, 2009

Trip:

As we discussed at our meeting January 6<sup>th</sup>, we would like to express our support for your continued efforts to investigate whether a wind generation facility might be feasible here in Lowell. We fully appreciate that without such information it will be impossible for anyone to consider the specifics related to any such potential.

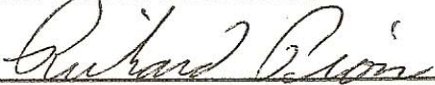

Towards that end we would like to express our support for your efforts to erect several wind measurements towers along the 2.5 mile section of the ridge being investigated. It is our understanding that while these measurement towers may be in place for several years, their placement will not be of a permanent nature.

We trust, and hope, that as your investigations progress you will make all reasonable efforts to not only keep us, the Selectboard, and members of the wider Lowell community informed, but also engage the regional community of which we are part. That way if, and when, you may have a specific proposal to present for the town's consideration, we will be in a position to give it the informed consideration it deserves.

Your project sounds exciting and important for Vermont's energy future, and could potentially offer many benefits to our community. We are especially pleased to hear that you are working with Vermont Electric Cooperative and Green Mountain Power, and we look forward to hearing of your continued progress.

Respectfully,

The Lowell Selectboard
